

Digital Mental Health

Many people with mental health problems can find online interventions helpful. Some programs can be as effective as face-to-face treatment, particularly if there is additional practitioner support (Griffith et al., 2010; Andersson & Hedman, 2013; Andrews et al., 2010; Andersson et al., 2014).

Digital Mental Health (e-mental health) is services, programs or applications, delivered via online, mobile or phone based platforms. They may be self-driven or practitioner guided and can be used alone or in combination with face-to-face therapy.

DISCLAIMER:

The information provided throughout this guide is intended for information purposes only. Whilst many of the services and resources in this guide are government funded, health practitioners should independently investigate, evaluate and verify the content and credentials of any service or resource before choosing to use it or refer a user to it. The services and resources listed in this guide are not exhaustive and represent primarily Australian products.
